INVESTMENT APPROACH

Matthews Asia believes in the long-term growth of Asia, one of the world's fastest-growing regions. Since 1991, we have focused our efforts and expertise in these countries, investing through a variety of market environments. Matthews Asia is the largest dedicated Asia-only investment specialist in the United States. With \$32.5 billion in assets under management as of September 30, 2018 Matthews Asia employs a bottom-up, fundamental investment philosophy with a focus on long-term investment performance.

Matthews Asian Growth and Income Fund

September 30, 2018

Investment Objective

Long-term capital appreciation. The Fund also seeks to provide some current income.

Strategy

Under normal market conditions, the Matthews Asian Growth and Income Fund seeks to achieve its investment objective by investing at least 80% of its total net assets, which include borrowings for investment purposes, in dividend-paying common stock, preferred stock and other equity securities, and convertible securities as well as fixed-income securities, of any duration or quality, of companies located in Asia, which consists of all countries and markets in Asia, including developed, emerging, and frontier countries and markets in the Asian region. The Fund attempts to offer investors a relatively stable means of participating in a portion of the Asian region's growth prospects, while providing some downside protection, in comparison to a portfolio that invests purely in common stocks. The strategy of owning convertible bonds and dividend-paying equities is designed to help the Fund to meet its investment objective while helping to reduce the volatility of its portfolio.

Risks

All investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation.

- The lesser of fiscal year 2017 long-term purchase costs or sales proceeds divided by the average monthly market value of long-term securities.
- The MSCI All Country Asia ex Japan Index is a free float—adjusted market capitalization—weighted index of the stock of markets of China, Hong Kong, India, Indonesia, Korea, Malaysia, Pakistan, the Philippines, Singapore, Taiwan and Thailand. Index is for comparative purposes only and it is not possible to invest directly in an index.
- Calculated from 8/31/94.
- The Lipper Category Average does not reflect sales charges and is based on total return, including reinvestment of dividends and capital gains for the stated period.

Performance assumes reinvestment of all dividends and/or distributions before taxes. All performance quoted represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate with market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the return figures quoted. Returns would have been lower if certain of the Fund's fees and expenses had not been waived.
