Matthews Asia Focus Fund

December 31, 2018

Investment Objective

Long-term capital appreciation.

Strategy

Under normal market conditions, the Matthews Asia Focus Fund seeks to achieve its investment objective by investing at least 80% of its total assets, which include borrowings for investment purposes, in the common and preferred stocks of companies located in Asia Ex Japan, which consists of all countries and markets in Asia excluding Japan but including all other developed, emerging and frontier countries and markets in the Asian region. The Fund seeks to invest in companies capable of sustainable growth based on fundamental characteristics. Companies in which the Fund invests typically possess, in the portfolio managers' judgment, such attributes as a high quality management team, strong corporate governance standards, sustainable return on capital over an extended period, strong free cash flow generation and an attractive valuation in relation to growth prospects and intrinsic value. The Fund is currently expected to hold stocks of between 25 and 35 companies under normal market conditions.

Risks

All investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. In addition, focused funds may be subject to a greater risk of loss because a single security's increase or decrease in value may have a greater impact on the Fund's value and total return.
