

Matthews Asia Credit Opportunities Fund

March 31, 2019

Investment Objective

Total return over the long term with an emphasis on income.

Strategy

Under normal market conditions, the Fund seeks to achieve its investment objective by investing at least 80% of its net assets, which include borrowings for investment purposes, in debt and debt-related instruments issued by companies as well as governments, quasigovernmental entities, and supranational institutions in Asia. Debt and debt-related instruments typically include bonds, debentures, bills, securitized instruments (which are vehicles backed by pools of assets such as loans or other receivables), notes, certificates of deposit and other bank obligations, bank loans, senior secured bank debt, convertible debt securities, credit-linked notes, inflation-linked instruments, repurchase agreements, payment-in-kind securities and derivative instruments with fixed income characteristics.

Risks

All investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation.

RISKS

An investment in the Fund is subject to credit, interest rate and currency risks. Credit risk is the change in the value of debt securities reflecting the ability and willingness of issuers to make principal and interest payments. Interest rate risk is the possibility that a Fund's yield will decline due to falling interest rates and the potential for bond prices to fall as interest rates rise. Currency risk is a decline in value of a foreign currency relative to the Fund's base currency which reduces the value of the foreign currency and investments denominated in that currency. The Fund may invest in the following: derivatives which can be volatile and affect Fund performance; high yield bonds (junk bonds) which can subject the Fund to substantial risk of loss; and structured investments which can change the risk or return, or replicate the risk or return of an underlying asset. The Fund is non-diversified and may invest a larger portion of its assets in a single issuer and may entail greater risk than a diversified fund.

PERFORMANCE AS OF MARCH 31, 2019

	Average Annual Total Returns							Since Inception	Since Inception
	3 Months	YTD	1 Year	3 Years	5 Years	10 Years

GROWTH OF A \$10,000 INVESTMENT SINCE INCEPTION — INVESTOR

The performance data and graph do not reflect the deduction of taxes that a shareholder would pay on dividends, capital gain distributions or redemption of fund shares. Values are in US\$. Source: BNY Mellon Investment Servicing (US) Inc., Index data from J.P. Morgan.

- 1 After contractual fee waiver, expense reimbursement and/or recoupment effective through April 30, 2019.
- 2 Modified duration measures the percent change in value of the fixed income portion of the portfolio in response to a 1% change in interest rates. In a multi-currency denominated portfolio with sensitivities to different interest rate regimes, modified duration will not accurately reflect the change in value of the overall portfolio from a change in any one interest rate regime. Source: FactSet Research Systems, Bloomberg. For detailed modified duration exposures by currency, please see the next page.
- 3 The lesser of fiscal year 2018 long-term purchase costs or sales proceeds divided by the average monthly market value of long-term securities.

Performance assumes reinvestment of all dividends and/or distributions before taxes. All performance quoted represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate with market conditions so that when redeemed, shares may be worth more or less than their original cost. Current performance may be lower or higher than the return figures quoted. Returns would have been lower if certain of the Fund's fees and expenses had not been waived. For the Fund's most recent month-end performance visit matthewsasia.com.

- 4 Holdings may combine more than one security from the same issuer and related depositary receipts.
5 Percentage values in data are rounded to the nearest tenth of one percent; the values may not sum to 100% due to rounding. Percentage values may be derived from different data sources and may not be consistent with other Fund literature.
6 Cash and Other Assets may include the mark-to-market value of forward currency exchange contracts and certain derivative instruments.
7 Credit quality is provided for the underlying bond holdings of the Fund and does not include common equities, cash and other assets and percentage values will not total 100%. Credit quality rating symbols reflect that of S&P and generally credit ratings range from AAA (highest) to D (lowest). When ratings from Moody's, S&P and Fitch are available for a bond in the Fund, the middle rating of the three is used. When two ratings are available, the lowest rating is used. When only one rating is provided, that one is used. Foreign government bonds without a specific rating are assigned the country rating provided by one of the three agencies. Securities that are not rated by any one of the three agencies are reflected as such.
