Investment Objective

Long-term capital appreciation.

Strategy

Under normal circumstances, the Matthews Emerging Asia Fund seeks to achieve its investment objective by investing at least 80% of its total assets, which include borrowings for investment purposes, in the common and preferred stocks of companies located in Asia excluding Japan, South Korea, Hong Kong and Singapore. The Fund may also invest in the convertible securities, of any duration or quality of companies located in Asia excluding Japan, South Korea, Hong Kong and Singapore. The Fund is expected to invest a substantial portion of its net assets in the emerging countries and markets in the Asian region, including but not limited to, Bangladesh, Cambodia, China (including Taiwan, but excluding Hong Kong), India, Indonesia, Laos, Malaysia, Mongolia, Myanmar, Pakistan, Papua New Guinea, Philippines, Sri Lanka, Thailand and Vietnam ("Emerging Asian Countries"). The Fund seeks to invest in companies capable of sustainable growth based on the fundamental characteristics of those companies, including balance sheet information; number of employees; size and stability of cash flow; management's depth, adaptability and integrity; product lines; marketing strategies; corporate governance; and financial health.

Risks

All investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. Investing in emerging and frontier markets involves different and greater risks, as these countries are substantially smaller, less liquid and more volatile than securities markets in more developed markets.
